Week 1 Logic Lab

PARSING ARGUMENTS IN FRESH CASES

Purpose: Use Whately's four-step test on **new** examples. For each argument below, work with: **Conclusion** (what is being claimed), **Stated reason** (what support is actually given), **Hidden assumption** (what unstated idea must be true for the reason to prove the conclusion), and **Follows** (does the conclusion actually follow?). Do not copy examples from the reading handout; reason about the sentences given here.

Part 1: Name the Claim and the Reason

Question 1.1

"Our team has won its last three games, so we will definitely win the championship." State the **conclusion** and the **stated reason** in your own words.

Part 1 Q1

Question 1.2

"She apologized in a sincere tone, so she must truly regret what she did." State the **conclusion** and the **stated reason** in your own words.

Part 4: Find the Argument in a Paragraph

Question 4.1

Read the paragraph below. It mixes scene-setting details with one main argument. Ignore the distractors. Identify the **conclusion**, **stated reason**, **hidden assumption**, and whether the conclusion **follows**. Label your answer clearly.

The city council met in a crowded hall while protesters chanted outside and a local reporter live-streamed the first hour. Council member Ortiz reminded everyone that her brother once missed work because of a bus delay. After the budget officer reviewed last year's spending charts, the council voted to expand late-night bus service. Supporters said that workers on evening shifts often cannot get home safely and that ridership on the pilot route rose after the trial began. A few online commenters joked that the city should buy everyone scooters instead. The council's decision, announced just before midnight, was that late-night bus service should be widened across the east side.
