Week 18 Logic Lab

PORTFOLIO REVISION WORKSHOP

Purpose: Build one verifiable revision trail: select an artifact, recover its reasoning, diagnose a precise weakness, revise substantively, and explain the growth shown.

Part 1: Select and Recover

Question 1.1

Identify one completed portfolio artifact by assignment or title. State its original claim or task and quote or accurately describe one feature of your original reasoning.

Part 1 Q1

Question 1.2

Why is this artifact a useful revision candidate? Name the before-and-after growth it could make visible; do not answer only that the score was low or high.

Part 1 Q2

Part 2: Diagnose with a Criterion

Question 2.1

Recover the artifact's reasoning: state its conclusion, support, and one hidden assumption or inference connecting them.

Part 2 Q1

Question 2.2

Diagnose one exact weakness or limit. Name the fitting Whately criterion and point to the feature of the original that the criterion tests.

Part 2 Q2

Assignment ID: U1L18LL Rev: 1 Page 3 of 5

Part 3: Revise the Reasoning

Question 3.1

Write a revised claim or conclusion that responds to the diagnosis while preserving what the original evidence can honestly support.

Part 3 Q1

Question 3.2

Revise the support or inference. Add, remove, clarify, qualify, or reconnect material so that the revised reasoning earns the preceding claim.

Part 3 Q2

Student ID:

Assignment ID: U1L18LL Rev: 1 Page 4 of 5

Part 4: Caption and Connect

Question 4.1

Write a reflective caption for the revision trail. Explain what the original attempted, what changed, which logical habit guided the change, and what the revision now shows about your judgment.

Part 4 Q1

Question 4.2

Connect this artifact to one other portfolio artifact. State one recurring habit or pattern of growth that both pieces can support, and name the evidence in each.

Part 4 Q2

Student ID:

Assignment ID: U1L18LL Rev: 1 Page 5 of 5

Part 5: Review

Question 5.1

A student revises “Three crowded buses prove the entire transit system is unreliable” to “These three trips show a recurring crowding problem on one route.” Use a prior-week tool to explain one logical improvement and one remaining evidence need.

Part 5 Q1

Question 5.2

An essay says, “The principal’s speech was emotional, so none of its safety claims had evidence.” Use a prior-week rhetoric tool to repair this judgment without treating emotion as proof.

Part 5 Q2
